# *Did You Know We Offer This Too...?*

## **Video Recording**

Capture your event on video. We offer trained technicians who can record your event for future use. Recordings can be done in a variety of formats for any use. It is even possible to walk out of the presentation with a DVD of what just occurred.

## **Audio Recording**

Record the discussion of your presentation, including audience participation. This allows you to capture the presentations content and even the question and answer portions. This is a great benefit if a transcription of the presentation is needed.

## **Production & Editing**

Captured video and audio can be produced into a final presentation. This means we can assist with putting your presentation together which you will show at our property, or we can edit the footage captured at our property and convert it to your desired final product.

## **Duplication**

Once audio or video has been captured, we can handle all of your duplication needs.
